TrendScout · user flow evidence

LOCAL / NOT YET PUBLIC | SYNTHETIC fixture flow | YouTube live and derived processing: PENDING APPROVAL

Current flow in the local synthetic demo

1 · Open
Visitor opens the dashboard; no login, account or API key entry.

→

2 · Check capability
Backend advertises enabled synthetic Fetch or a disabled reason.

→

3 · Fetch
User clicks once. Server controls sources, limits and duplicate requests.

→

4 · Observe status
UI polls a bounded result and shows source status and SYNTHETIC origin.

Review and limitations

5 · Explore keywords
View candidates and use keyword search or category filters.

→

6 · Inspect evidence
Open keyword detail and source evidence; missing baseline remains insufficient.

→

7 · Policy pages
Review draft Privacy Policy and Terms. Owner must complete identity, contact and retention before publication.

→

Future live path
Provider permission, quota/cost and data policy must be approved and verified before live activation. YouTube-derived analysis is not approved.

Screenshots document the local synthetic flow only. Search localization does not prove US user demand; SERP rank is not search volume. No user credentials, provider keys or live results are included. Local baseline d34f712; 12 Nov 2026.
